

COSMOS2020 NEWSLETTER #36

13 April 2018

Save the date International Event on Space Opportunities in Horizon 2020

20 June 2018, ETH Zurich (Switzerland)

On 20 June 2018 Euresearch & Space Center together with COSMOS2020 and the kind support of the State Secretariat for Education, Research and Innovation / Swiss Space Office will organise an international Space Event comprising Matchmaking, Exposition and first-hand information on the next Horizon 2020 Space Call. Since the next EU Framework Programme is already under development some early information will also be provided.

Reserve the date to keep you chance to join this early opportunity to learn about the call content and meet potential partners. Registration will soon be opened. We'll keep you informed via the [COSMOS2020](#) and [Euresearch](#) websites.

Record of Coordinators' Day on Amendments and Reports available on EC Website

The European Commission organised an information session in Brussels for H2020 participants, taking place on 12 April 2018. The participants learned about legal aspects, business processes and IT tools used to prepare grant amendments and reports, with particular attention to the financial aspects and eligibility of costs.

The Coordinators' Day was mainly meant for grant coordinators, but open to everybody. The record of the full day is now free available on the website of the EC.

IPR Helpdesk Webinar on Consortium Agreements 2 May 2018

This webinar aims at providing a general overview of the way in which the drafting and negotiation of consortium agreements should be addressed in H2020, with a focus on IP provisions.

After the training, participants should be able to answer the following main questions:

- What is a consortium agreement? When should it be signed, and by whom?
- What model consortium agreements are available, and for what types of projects?
- What issues should a consortium agreement deal with?
- Regarding IP: which GA rules should not be contradicted by the CA?
- Regarding IP: what are the areas in which GA rules leave flexibility for the CA?
- Regarding IP: how to use the CA as a tool: examples of clauses to add to your draft

The registration will open on the 10th of April (register soon).

Copernicus for Cultural Heritage

Satellites to preserve the legacy from our past! 2018 is the European Year of Cultural Heritage. Throughout the year, tangible and intangible, as well as natural and digital cultural heritage of Europe is celebrated. The free and open data and information delivered by the Copernicus programme represents a valuable resource for Cultural Heritage monitoring and preservation at European and global level.

Cultural heritage, a shared source of remembrance, understanding, identity, dialogue, and creativity, represents an irreplaceable source of life and inspiration while contributing to social cohesion and economic growth. The importance of cultural heritage preservation is globally recognised.

Nowadays, tangible and natural cultural heritage is in danger, because of natural hazards and Climate Change, as well as man-made threats and criminal activities. It is our collective responsibility to act.

The data and information offered by the Copernicus programme can contribute to tangible and natural cultural heritage preservation and management. Earth Observation (EO) data is becoming increasingly instrumental, with numerous projects and applications aimed at providing products tailored to the needs of cultural heritage.
